DETAILED ACTION

Election of Species

1. This application contains claims directed to the following patentably distinct species of the claimed invention: Claim 1 is drawn to a loudspeaker comprising a wire coil wherein the adjacent windings of the wire are spaced substantially between seventy-five to one hundred fifty percent of the wire's diameter, as illustrated in figure 5; Claims 2 and 3 are drawn to a loudspeaker comprising a basket(80) constructed on non-sound-reflective material and further including a perforated metal cover(78) as illustrated in figures 12-13; Claim 4 is drawn to a loudspeaker comprising an flux gap wherein a coil is disposed between an inner and outer metal sleeve(41), as illustrated in figures 8 and 9; Claim 5 is drawn to a loudspeaker comprising a hollow elongated structure(90) and relatively stiff plate(92) mounted on a compliant suspension(98) to an end of the elongated structure, as illustrated in figure 11; and Claim 6, which is drawn to a rearwardly extending enclosure(114) for the acoustic driver which terminates in a direction generally opposite of the acoustic driver, as illustrated in figures 14 and 15. The Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement may be traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
